How to win friends and influence people, engineer edition!

We already know you can build great things and help make the world a better place. To do so, some of the most important non-engineering skills are people management and teamwork. This workshop will share with us the magic formula of taking key engineering skills and turbocharging them with the effectiveness of translating these skills into a work environment.

The reality of the work environment is that you will be valued for your ability to be effective through working with others. Having optimum teamwork skills is essential to becoming well-respected and successful in an engineering profession.

Engineering is a team sport and this workshop will share with you the basic skills you will need to succeed as engineers. This workshop will identify the teamwork capabilities that you will need to understand to be an effective team member in your future work!

Friday, October 18, 2024
Friday, October 25, 2024
Friday, November 1, 2024
10 AM - 2 PM

All sessions will be conducted in person.
Location: 1 Metrotech Center, room 1930/1931
