

HIGH PERFORMANCE COMPUTING

High-Performance Computing allows for fast processing of huge volumes of data. Across countless domains of study, cutting-edge research is taking advantage of modern computing technology to analyze data at large scale, perform massive calculations, run detailed simulations, and leverage artificial intelligence algorithms. Familiarizing yourself with the HPC resources at NYU can help you take advantage of those technologies for your own research, making it faster, more efficient, and more scalable.

RSVP!

FRIDAY, APRIL 21 10AM-6PM
FRIDAY, MAY 4 10AM-4PM

1 METROTECH CENTER, JACOBS
SEMINAR ROOM 1930/1931
